EDUCATION

The University of Edinburgh

Bachelor of Science (Honours) in Computer Science

Edinburgh, United Kingdom

Expected Graduation: July 2026

- **Relevant Courses:** Algorithms and Data Structures, Object-Oriented Programming, Machine Learning Practical, Distributed Systems, Natural Language Processing, Computer Systems, Computer Networks, Software Testing
- **Predicted Results:** On track for **First-Class Honours**

TECHNICAL SKILLS

Languages: Java, Python, Swift, JavaScript, TypeScript, Haskell, SQL (PostgreSQL), C, Scala, HTML, CSS

Libraries: React, Matplotlib, pandas, scikit-learn, OpenCV, Pytesseract, Tensorflow, Keras

Frameworks: Node.js, Spring Boot, FastAPI, Flask, SwiftUI, Apple Core Data, Apple HealthKit, JUnit, XCTest

Tools & Platforms: Git, GitHub Actions, Supabase, Docker, Postman, Google Cloud Platform, Linux, Twilio

EXPERIENCE

Pera (Pirum Group Ltd.)

Software Engineering Intern

London, United Kingdom

June 2025 – August 2025

- Developed RESTful microservices in **Python** (FastAPI), integrating user endpoints with **PostgreSQL**, **Redis**, and **Qdrant** for vector-based semantic matching; using CI/CD pipelines for automated testing and GCP integration
- Integrated SMS 2FA using Twilio with idempotency, reducing user onboarding time from 3 minutes to 30 seconds
- Collaborated directly with founders in a fast-paced startup environment, shaping technical directions and decisions

Keysight Technologies

Software Engineering Intern

Penang, Malaysia

June 2024 – September 2024

- Developed an approval-based request tracking system within an **Agile** Scrum team with developers and designers, automating the process of tracking **500+** monthly requests handled by **30+** Knowledge Engineers company-wide
- Engineered a batch data processing pipeline for product item uploads, reducing processing times by over **90%**
- Spearheaded the development of a custom **SQL** Code Generator Tool, enabling non-technical staff to query data from the **Microsoft SQL Server** Relational Database System consisting of over **10,000** records within **50+** tables

PROJECTS

HealthMY - AI-Assisted Health Manager App | Swift, CoreData, HealthKit, FastAPI 📱

June 2025

- Founded and engineered an **iOS-based** health management platform using **SwiftUI** + **FastAPI** to assist users in tracking and analyzing health records, supporting **20+** individual health metrics (eg. blood pressure and pulse)
- Integrated AI-driven personal wellness insights using **ML Models** and **LLMs**, yielding consistent health trend predictions and insights using **1000+** data points provided through **Apple HealthKit**, validated using **XCTest**

CardGPT - AI-Powered Flashcard Collaboration Platform | React, Flask, Supabase 🗂️

March 2025

- Built and deployed a full-stack AI-powered flashcard generator and sharing platform using **React** + **Flask**
- Integrated Google Gemini API with custom **prompt engineering**, generating relevant flashcards in under **1.5s**
- Hosted a community card-sharing platform using **Supabase** with **JWT**-based auth, maintaining **>90%** uptime

PizzaDronz - Drone Delivery System | Java, Spring Boot, Maven, Docker, Postman

Nov 2024 – Jan 2025

- Engineered a modular RESTful backend in **Java** + **Spring Boot** to simulate autonomous drone deliveries with real-time route optimizations using **A* search** and in-memory caching across a **10km²** grid
- Deployed Dockerized microservices, handling **100+** concurrent delivery requests with **<150ms** API response times

LEADERSHIP

JPMorgan Chase - Code For Good 2025 Hackathon

Front-End Developer

Glasgow, United Kingdom

Oct 2025

- Led the development of an AI-based recommendation system for nonprofits at JPMC's annual flagship hackathon

Edinburgh University Trading and Investment Club (EUTIC)

Head of Technology

Edinburgh, United Kingdom

August 2025 - Present

- Led the technology infrastructure behind the UK's largest student-led investment fund (**>£94,000** in AUM)
